Questions

1. What do you see as the main principles of the CAP reform proposals in comparison with the current CAP?
2. What is your opinion on these main principles?
3. What is your opinion on the redistribution proposals of Pillar I payments between old and new Member States?
4. With reference to the Direct Payment Regulation, has the Commission identified the correct concerns on which to target direct payments?
5. More specifically, what is your opinion on the Commission's proposals concerning:

Subject	Opinion
Eligible hectare as a basis for Direct Payments	
Green payment	
Payments for areas with natural constraints	
Young farmers payment	
Small farmers scheme	
Coupled support	
Payment cutting and capping	
Definition of active farmer	

6. The Commission proposes a progressive regionalisation of basic payments and their convergence towards uniform levels at national or regional levels by 2019. How do you judge this choice?
7. The Commission proposes to keep the same distribution of the CAP budget between Pillar I and Pillar II as in the current CAP. Do you agree with this?
8. What is your opinion on the proposed changes in the new rural development policy (replacement of Axes with priorities, integration with regional policy in the partnership contracts, outcome-based approach, thematic sub-programmes, the menu of measures, networking for innovation, etc.)?
9. A further novelty of the legislative proposals is the introduction of a risk management toolkit. What do you think about this instrument and the choice to attribute it to the second pillar?
10. In short, what are the most positive and the most negative aspects of the legislative proposals on the new agricultural policy for the period 2014-2020? (*Please specify only one positive and one negative aspect*)
