Where ex ante analysis undertaken by the Member State concerned shows that the estimate of the product of capping is higher than the needs for the redistributive income support for sustainability based upon, Member States may use the excess product of capping within direct payments to finance other interventions belonging to decoupled direct payments.

Where the capacity to absorb the whole product of capping in decoupled direct payments would be insufficient, Member States may use the excess product of capping to finance types of interventions under the European Agricultural Fund for Rural Development (EAFRD) as specified in Chapter X [cross-reference to RD] by means of a transfer. Such transfer to the EAFRD shall be part of the CAP Plan financial tables and may be reviewed in accordance with the deadlines in the [Article on flexibility].
